

Völker Long Term Care beds

Providing a range of care options

Unverwechselbar
VÖLKER

The perfect combination of choice, style and functionality

For a comfortable, home-like ambience

Völker Long Term Care beds are available in a range of designs and colours, combining the necessary functions of a medical device with enhanced styling to give a nursing room a home-like ambience, for the improved comfort and wellbeing of residents.

The Völker brand is synonymous with the concept of dignified care - that every resident has the right to be treated with respect and dignity, especially people in need of care. Völker beds are developed and manufactured with this in mind.

Völker also offers a low-height bed for fall-prone residents. For more information, please ask your local Hill-Rom representative.

Vis-a-Vis

Innovative Völker Micro-stimulation System MiS®

The patented Völker MiS sleep deck, detects even small movements and responds with tactile stimulation. This responsive feedback promotes spontaneous movements and micro-circulation in the tissues to enhance blood circulation. This can lead to greater comfort, improved sleep, and increased mobility. Residents can sleep well, awaken well-rested and start the day feeling motivated.

Innovative split siderail system from Völker

3080 and Vis-a-Vis

The patented Völker split siderail system (available on the 3080 and Vis-a-Vis bed) is highly versatile and provides residents with a secure support for repositioning in bed or pushing themselves up to leave the bed from the side. The system consists of head and foot telescopic split siderails that articulate in harmony with the bed's movements, providing full lateral protection from when the bed's sleep deck is level through to when the bed is in the sitting position. When fully raised, the versatile split siderails provide enhanced protection for the resident in a lying or sitting position.

Völker split siderail system

Enhancing Care for Residents

3080

Independent egress

The easy-to-grip split siderails provide secure support to enable safe and independent egress, which encourages resident independence. Residents can independently adjust the height and lying surface using the intuitive, ergonomically designed hand control.

The Völker Vis-a-Vis bed

Mobilisation promotes participation in daily activities, as well as encouraging independence and wellbeing for residents of Long Term Care facilities. The Völker Vis-a-Vis bed with split siderails, supports safe mobilisation of residents to an upright sitting position, with minimal risk to resident and the caregiver.

From this position, an individual caregiver can easily and safely mobilise the resident in a forward direction, until the individual is sitting upright with feet firmly planted on the floor.

Vis-a-Vis

Vis-a-Vis

Vis-a-Vis sitting position

The sitting position is effortlessly achieved to enable residents to communicate face-to-face with caregivers and visitors.

Maximum versatility and stability

3080 and 2080

3080

2080

The Völker 3080 and 2080 beds meet a broad range of requirements for use in Long Term Care facilities

To provide optimal care and promote resident mobility, caregivers must have confidence in the stability of the bed at various working heights. The sturdy four-column telescopic undercarriage on the 3080 and 2080 keeps the bed frame from moving or rocking in any direction, even when unevenly loaded, providing maximum stability and safety.

3080

Safe mobilisation

- Residents can **independently adjust** height, lying surface and sitting position using the intuitive, ergonomically-designed pendant control
- Additional **caregiver pendant control** is available enabling total lock-out functionality
- The 3080 and 2080 beds have a **Safe Working Load** of 230 kg

Castors can be concealed when not in use (on the 3080 and 2080 beds).

Integrated Design

The full-length siderails on the 2080 and the castors are neatly hidden into the bed when not in use.

2080

Safe mobilisation for caregivers and residents

3080

When using Völker Long Term Care beds in combination with the range of lifts and accessories from Liko (a Hill-Rom product brand), an individual caregiver can easily and safely mobilise the resident to a standing position with less risk of caregiver injuries. Liko offers a wide range of slings to accommodate a variety of resident care settings.

Cleverly designed accessories, have a unique range of features that provide the flexibility to adapt each raising or lifting operation to the capabilities and specific needs of the resident.

Easier, safe mobility promotes independence and more active living

By combining innovative bed systems and Liko lifts with structured mobility and fall prevention programs, caregivers can mobilise residents safely, easily, and more frequently.

Völker beds, along with Liko mobile and overhead lifts promote independent mobility, helping Long Term Care residents participate more fully in daily activities at their own pace.
